DragonBall Finance

The first Dragonball DeFi platform on the Binance Smart Chain.

What is DragonBallFinance

⚫ DragonBallFinance is the first fully decentralized All in One DeFi platform on the Binance Smart Chain network that brings the Dragonball theme in the current boring foody name DeFi world.

⚫ Liquidity raised through IDO on Saltswap launchpad.

⚫ The only way to have $DBALL will be to buy it or farm it with stable pairs LPs/ single asset staking.

DragonBallFinance will implement several products and mechanics that ensure the sustainability of the project even in the long term perspective.

Intro continued

$DBALL farms and staking pools

$DBALL Buy back and transaction fee to control inflation

Layered farming

No migrator code, timelock, audits

Tokenomics

DragonBallFinance token ($DBALL)
Initial mint 410,000 $DBALL
IDO price 1 BNB = 500 $DBALL
IDO allocation 25,000/250,000 $DBALL
Soft cap/hard cap 50/500 BNB
30% of raised funds added in liquidity
60% of raised funds for development and products expenses.
10% SALTSWAP IDO launchpad fee.

All unsold tokens will be burned
Listing price 1 BNB = 400 $DBALL
liquidity allocation 14,800/144,800 $DBALL
partnerships, marketing and
contests funds 15,200 $DBALL

(all locked for the first 2 weeks, community will decide how to use them)

Tokenomics

DBALL
DragonBallFinance Token

DBALL token will be
the native token of the protocol, it will be used
to reward farmers, stackers and it will grant benefits
to holders over the project.
a 3% stacking fee, and 2% unstacking fee
will be applied and used for:
50% buy back $DBALL and burn it
50% allocated to further platform developments.

Tokenomics

SENZU
DragonBallFinance Token

SENZU token will be
used to reward layered farming investors.
a 7% stacking fee will be applied and used for:
40% buy back $DBALL and burn it
40% buy back SENZU and burn it
20% allocated to further platform developments.

Farms

2% un-staking fee for all
pools 3% staking fee for
all pools apart from $DBALL

$DBALL-BUSD 6x   EGG-BNB 0.2x

$DBALL-BNB 4.5x   ALPHA-BNB 0.2x

BNB-USDT 0.5x   LINK-BNB 0.2x

BUSD-USDT 0.2x   FIL-BNB 0.2x

BTCB-BNB 0.3x   XCUR-BNB 0.5x

ETH-BNB 0.3x   UNI-BNB 0.2x

DAI-BUSD 0.2x   LIT-BNB 0.5x

CAKE-BNB 0.2x

Pools

2% un-staking fee for all
pools 3% staking fee for
all pools apart from $DBALL

$DBALL 3x	ALPHA 0.2x
BUSD 0.3x	LINK 0.2x
USDT 0.3x	SALT 0.2x
DAI 0.3x	FIL 0.2x
BNB 0.4x	XCUR 0.5x
BTC 0.4x	UNI 0.2x
ETH 0.3x	LIT 0.5x

Layered Farming

7% Deposit fee for all pools to earn SENZU

$DBALL 1x
$DBALL/BNB 1.5x
$DBALL/BUSD 2x
SENZU/BNB 3x
SENZU/BUSD 4x
SENZU 2x

Investors' security and safety

Migration code has been removed from DragonBallFinance smart contracts hence investors funds are safe and can never be moved.
Timelock code has been added ensuring investors will have a lot of time to check any change applied to the code.

All DragonBallFinance smart contracts are gonna be audited and be published before launch for anyone to read, ensuring the genuinity of the DragonBallFinance code which is a goosedefi fork.

DDOS and DNS attacks If something happens to the front-end (DDOS or DNS) or any issue, we have multiple backup Websites ready to launch right after any attempted attack.

ROADMAP

-DragonBallFinance charting tool
-Building FAAS platform
-More partnerships
-Moving to Polkadot

-Coingecko coinmarketcap listing
-Marketing and contests
-Develop layered farming
-Develop lottery
-Hire professional artists to develop NFTs
-NFTs marketplace development

-Draw initial whitepaper
-Hiring team mates and coders
-Deploying smart contracts
-Uploading website
-Smart contracts auditing
-Build DragonBallFarm community
-IDO/presale
-Add liquidity
-Launch farms and staking pools

-Partnerships
-DragonBallFarm launchpad
-DragonBallFarm DEX
-Games
